Atlanta Capital Management Company, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. Atlanta Capital Management has been independently verified for the periods January 1, 1999 through December 31, 2024. The verification reports are available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Firm Definition: Atlanta Capital Management Company, LLC (Atlanta Capital or the Firm) is an SEC-registered investment adviser located in Atlanta, Georgia. The Firm became a majority-owned subsidiary of Eaton Vance Corp. in 2001. On March 1, 2021 Eaton Vance and its affiliates which included Atlanta Capital Management became a part of Morgan Stanley Investment Management, a division of Morgan Stanley. Atlanta Capital provides professional investment advisory services to a broad range of institutional and individual clients, and sub-advisory investment management to mutual funds and separately managed wrap fee programs. Atlanta Capital includes all discretionary accounts under management in its composites; total firm assets include discretionary and nondiscretionary accounts for which the firm has investment responsibility.

Composite Definition: The investment objective of this style is to seek long-term capital growth. Accounts in this composite invest in common stocks of companies having market capitalizations that generally rank in the top 1,000 U.S. listed companies. Prior to the first quarter of 2003, the universe used for stock selection included companies having market capitalizations that ranked in the top 1,500 U.S. companies. The portfolios are invested in quality growth companies with a demonstrated record of consistent earnings growth. A company's quality is determined by fundamental analysis of its financial statements; financial quality ratings provided by nationally-recognized rating services may be utilized as part of the investment analysis but are not solely relied upon. Portfolios may invest in American Depositary Receipts up to 10% of the portfolios' market value. Prior to September 2010, sector weightings were restricted to 150% of the weighting in the S&P 500 Index. After that date portfolio construction is not limited by the relative weights of a benchmark; sector weighting is limited to a 30% maximum absolute constraint. All fully discretionary, wrap-fee paying, and transactions cost paying non-wrap fee, sub-advisory and program-sponsored advisory accounts managed in this strategy are eligible for inclusion in the composite. Individual accounts in the composite may contain account specific investment restrictions or features that may lead to differences in the holdings and performance of each account but are still eligible for inclusion in the composite.

For the period January 1, 2004 through December 31, 2010, the firm maintained a significant cash flow policy for this composite. When a cash flow of 10% or greater occurred in a wrap-fee account, the account was removed from the wrap-fee composite for the month in which the cash flow occurred. The account was reinstated in the composite at the beginning of the following month after the cash was removed from the account in the event of a withdrawal or reinvested in stocks in the event of a contribution. Beginning January 1, 2011, the policy for significant cash flows was no longer applied to this composite, and accounts are not removed from the wrap-fee composite due to cash flows. Additional information regarding the treatment of significant cash flows is available upon request.

Risk Considerations: The value of investments held by the strategy may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. The strategy is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices.

Benchmark: The composite's primary benchmark is the Russell 1000® Growth Index, a widely-accepted measure of the large cap growth segment of the U.S. equity universe. The index includes those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. As of June 30, 2011, the index was added as the primary style benchmark for this strategy to provide a growth style comparison; there was no impact on the investment process. The secondary benchmark, the S&P 500® Index, includes 500 leading companies in leading industries of the U.S. economy and is a commonly-used measure of large cap U.S. stock market performance. The investment process for this strategy is not limited by the relative weights of a benchmark. Strategy deviations from the benchmark may include but are not limited to such factors as active management, exclusion/inclusion of securities held/not held in the index, over/underweighting specific sectors or securities, limitations in market cap, and/or client constraints. Indexes include the reinvestment of dividends and earnings, are unmanaged, and do not incur management fees, transaction costs or other expenses associated with separately managed accounts. It is not possible to directly invest in an index.

Gross and Net Returns: Performance reflects reinvestment of all income and capital gains. Composite returns and market values are reported in U.S. dollars. Prior to January 1, 1999, composite gross returns are after transaction costs, foreign withholding taxes and other direct expenses, but before management fees, custody charges and taxes. From January 1, 1999 through December 31, 2020, composite gross returns are pure gross returns that do not include any fees, expenses or transaction costs. From January 1, 2021 forward, composite gross returns include transaction costs that are incurred by some of the accounts in the composite. Composite gross returns are presented as supplemental information. Composite net returns for all periods are calculated by deducting the highest annual managed account fee of 3.00% charged by sponsors for wrap-fee accounts in this composite from the gross performance returns. The fee is applied monthly. The managed account fee is a bundled fee that may include any combination of management, transaction, custody and other administrative fees. The annual fee schedule for this composite is as follows: 3.00% on all assets. Actual fees may vary from sponsor to sponsor. All fees for wrap-fee accounts in this composite are available from the managed account sponsors.

Composite Dispersion: The annual internal composite dispersion is calculated using the asset-weighted standard deviation of annual gross of fee returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The measure is disclosed for each composite and its benchmark where 36 monthly returns for the composite are available.

Notes to Composite: The creation date of this composite is May 2004. Effective January 1, 1999, this composite was redefined to include only fully discretionary, wrap-fee paying, sub-advisory and program-sponsored advisory accounts. Prior to that time, the composite information presented is that of the Firm's institutional High Quality Growth Plus Composite which included only tax-exempt institutional accounts and the equity plus equity cash portion of tax-exempt balanced accounts; none of the accounts paid a bundled fee. Effective December 2, 2011, a participating program sponsor with a significant number of accounts became solely responsible for all account rebalancing and trading activity. As a result, those accounts became ineligible for composite inclusion. As of January 1, 2021 the SMA High Quality Growth Plus Wrap Fee Composite was redefined to include all fully-discretionary SMA sub-advisory program accounts managed in this strategy. This includes accounts that do not pay commissions on trades (bundled fee) and accounts that do pay commissions on trades (non-bundled fee). Previously there were separate composites for accounts that did not pay a commission on trades (Wrap Fee Composites) and accounts that did pay commissions on trades (Transactions Cost Non-Wrap Fee Composites). Effective January 1, 2021 the SMA accounts that do pay commissions on trades are now included in the SMA Wrap Fee Composites. There has been no change in investment objective or management style due to the composite redefinitions. Clients or prospective clients should not assume that they will have an investment experience similar to that indicated by past performance results, as shown on the Schedule. Returns may vary based upon differences in account size, timing of transactions and market conditions at the time of investment. Performance during certain time periods reflects the strong stock market performance and/or the strong performance of stocks held during those periods. This performance is not typical and may not be repeated.

Other Matters: A complete list of composite descriptions and information regarding policies for valuing investments, calculating performance, and preparing GIPS® Reports are available upon request. To request any additional information, please contact the Performance Department at (800) 225-6265 ext. 26733 or write to Morgan Stanley Investment Management, One Post Office Square, Boston, MA 02109, Attention GIPS Performance Department, 18th floor. **Past performance does not predict future results.**

DEFINITIONS

Dividend yield is the ratio between how much a company pays out in dividends each year relative to its share price. **Market Capitalization** is the total dollar market value of all of a company's outstanding shares. **Return On Capital (ROC)** is a calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments. **Return On Equity (ROE)** is the amount of net income returned as a percentage of shareholders equity. The **Russell 1000® Growth Index** measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The **Russell 1000® Index** is an index of approximately 1,000 of the largest U.S. companies based on a combination of market capitalization and current index membership. **S&P 500® Index** is an unmanaged index of large-cap stocks commonly used as a measure of U.S. stock market performance.

IMPORTANT INFORMATION

RISK CONSIDERATIONS

There is no assurance that a Portfolio will achieve its investment objective. Portfolios are subject to market risk, which is the possibility that the market values of securities owned by the Portfolio will decline and may therefore be less than what you paid for them. Market values can change daily due to economic and other events (e.g. natural disasters, health crises, terrorism, conflicts and social unrest) that affect markets, countries, companies or governments. It is difficult to predict the timing, duration, and potential adverse effects (e.g. portfolio liquidity) of events. Accordingly, you can lose money investing in this Portfolio. Please be aware that this Portfolio may be subject to certain additional risks. In general, equities securities' values also fluctuate in response to activities specific to a company. **Investors should be aware that this strategy may be subject to additional risks, which should be carefully considered prior to any investment decision.**

There is no guarantee that any investment strategy will work under all market conditions, and each investor should evaluate their ability to invest for the long-term, especially during periods of downturn in the market.

A separately managed account may not be appropriate for all investors. Separate accounts managed according to the Strategy include a number of securities and will not necessarily track the performance of any index. Please consider the investment objectives, risks and fees of the Strategy carefully before investing. A minimum asset level is required.

For important information about the investment managers, please refer to Form ADV Part 2.

The views and opinions and/or analysis expressed are those of the investment team as of the date of preparation of this material and are subject to change at any time without notice due to market or economic conditions and may not necessarily come to pass. Furthermore, the views will not be updated or otherwise revised to reflect information that subsequently becomes available or circumstances existing, or changes occurring, after the date of publication. The views expressed do not reflect the opinions of all investment personnel at Morgan Stanley Investment Management (MSIM) and its subsidiaries and affiliates (collectively "the Firm"), and may not be reflected in all the strategies and products that the Firm offers.

Forecasts and/or estimates provided herein are subject to change and may not actually come to pass. These conclusions are speculative in nature, may not come to pass and are not intended to predict the future performance of any specific strategy or product the Firm offers. Future results may differ significantly depending on factors such as changes in securities or financial markets or general economic conditions.

This material has been prepared on the basis of publicly available information, internally developed data and other third-party sources believed to be reliable. However, no assurances are provided regarding the reliability of such information and the Firm has not sought to independently verify information taken from public and third-party sources.
